

MAXIMIZE WITH OUR NEW A1088 MAX

Features packaged for maximum enjoyment

Our A1088 MAX is the bigger brother to our A1088, which means it packs the same fast components and small footprint as before, but now with a bigger, expansive screen. The beautiful touchscreen gives more real estate for items, making it easier to order as well as navigate POS interfaces. Built in are a myriad of useful features such as the fast thermal printer that never requires ink. A card reader is installed on the right making all transactions a breeze. On the back is a handy customer display, letting them know the status of their orders. The A1088 MAX gives a strong feature set in a package that takes up less space.

Quad Core Arm Based CPU

Run any programs you want, watch them run quickly and efficiently

Built in: A Fast Thermal Printer

No need to buy a separate printer, or leave your customers waiting.

15" Touch Screen

Its large touch screen makes orders easier than on smaller devices.

SSD Included

Keep your database on your device for quick and easy access.

2 Line Customer Display

Prices and items can be shown to customers on the back of the unit.
